LEARNING DIARY, EXPRESSJS MODULE

LEARNING DIARY

STYLE 3
28.5.2020

In this module, I learned about express, mongo, express-validator, and a bit of routing. The tutorial was a bit outdated. I had to search through stackoverflow for information about the view template engine documentation for <%- include('partials/header') %> and <%- include('partials/header') %>. In addition, the express-validator was not working properly and took a while to fix. I learned about .ajax in jquery which I have never used. I would like to learn more template engines like pug or handlebars.
